

SAYTYA™
TALK.TEXT.SHARE.DISCOVER

ALL-IN-ONE TRULY SOCIAL

The Best of „OTT“ and
Charity in one smart App

SAYTYA is...
...open to everyone!

Excellent Messaging
VoIP to Cell Calls
Cell to VoIP Calls
Group Calls
Radio Streams
Donations by usage
Donations by call back

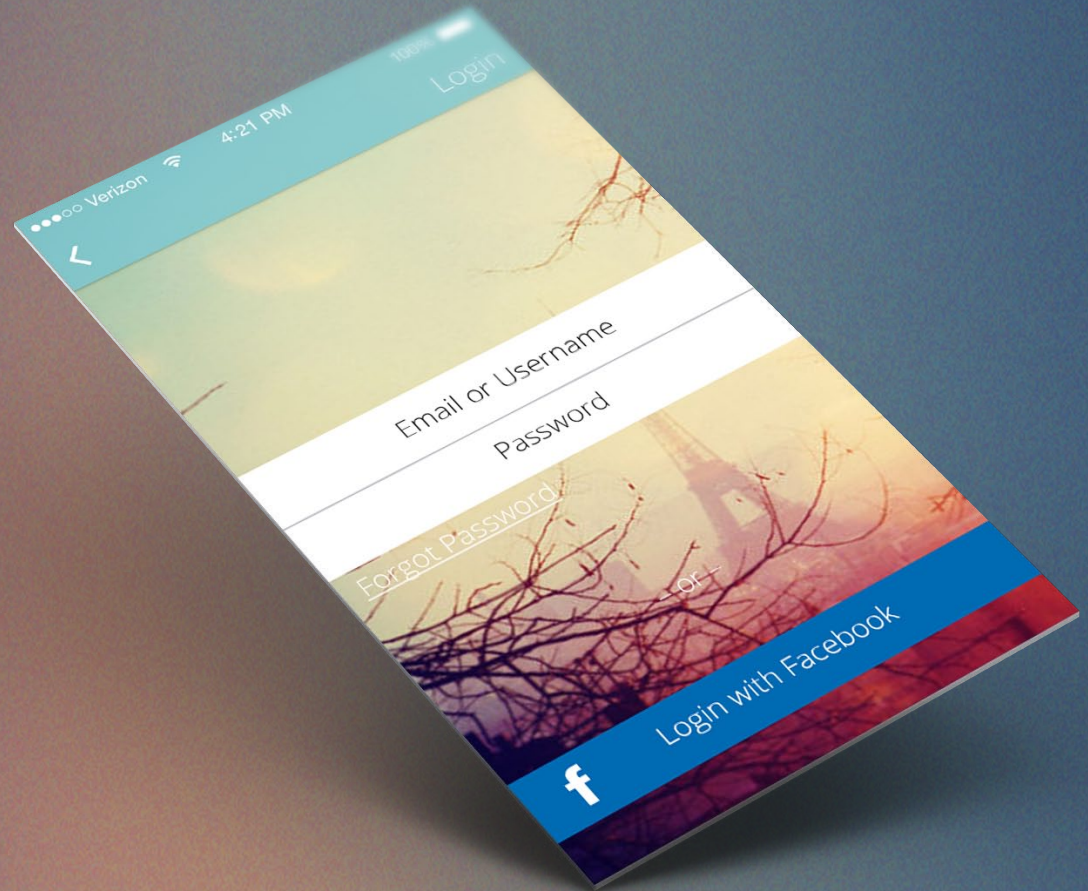

Open to all Users

Users can choose their own ID and log in via their mail adress & password.

No phone number or SIM card required to join!

Optional login via Facebook, Google+ and others at free choice.

Perfect Overview

All recent communications are listed historically and are accessible by a tap on their header.

Calls and messages are easily distinguished – missed calls can be answered by a single tap.

Favorites

The three last friends are always at the right of the screen - your most recent contacts always at your fingertips.

Selecting each of them leads to direct calling or messaging

Excellent Messaging

Full What's App functionality with text, image & audio - plus stickers and arrows.

Cleaner interface

Cooler design

Faster access

Extended Messaging

Stickers, badges, arrows and other add-ons to highlight or modify pictures.

Display of YouTube links and web links included inside SAYTYA 's interface

Full VoIP to VoIP

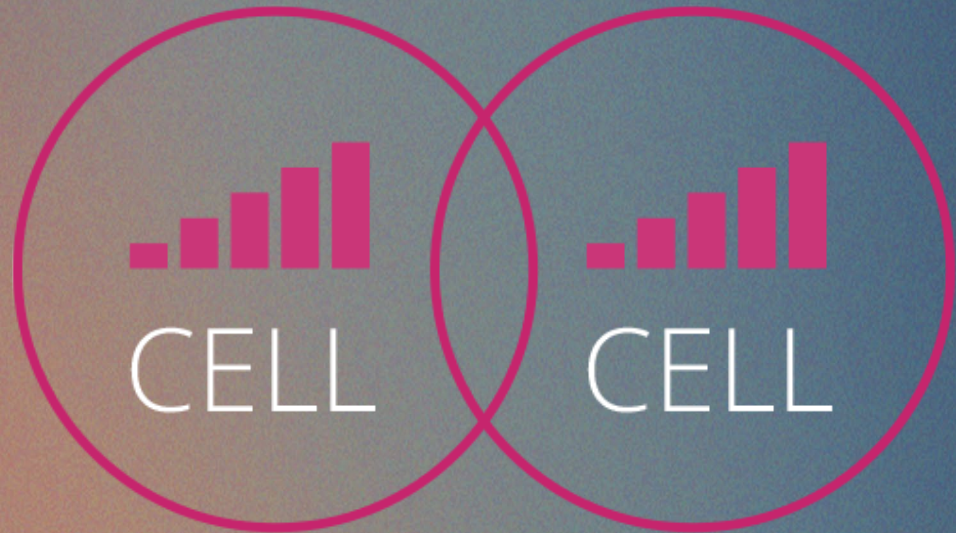

Excellent voice quality with lower or equal bandwidth of competitors like Skype, Google Voice and Viber. Hands free VoIP calls via speaker become possible without disturbing noise and blurr.

Full Cell to Cell

When VoiP is unavailable, SAYTYA automatically switches to cellular calling and connects via a national landline number. So Paris calls London from Taxi to Taxi at the price of a local call - or for free.

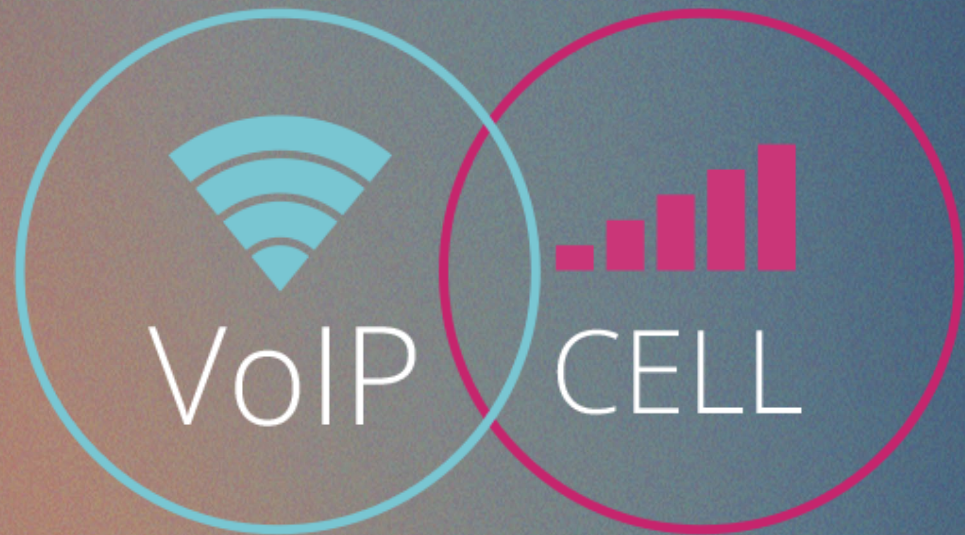

Full VoIP to Cell

If the calling party only owns a tablet or an iPod, SAYTYA still connects her to an iPhone or an Android phone in it's national cellular network for free. With cellular support for 60countries.

„Poor can now call Rich!“

Full Cell to VoIP

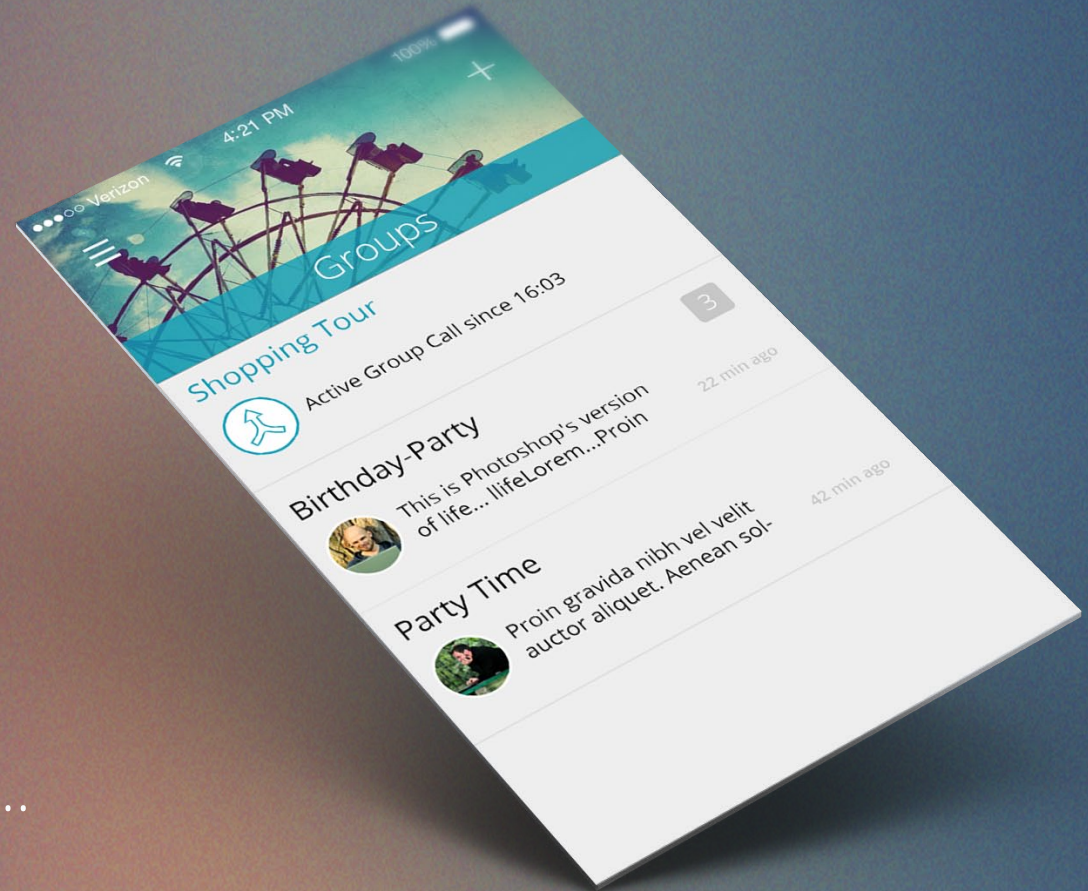

If the called party only has a tablet or an iPod, SAYTYA enables mobile cell calls to these devices when calling from on the move. With cellular support from 60 countries to SAYTYA's global VoIP access.

Groups

All contacts can be organized into groups. These groups can then be contacted via messaging or via group calls. No matter if in Cell or VoiP - without numbers or PINs. Fully automatic conferencing...
...anywhere & anytime...

Channels

Integrated radio streams
via cell or WiFi.

Basis for future extension
by subscribed channels.

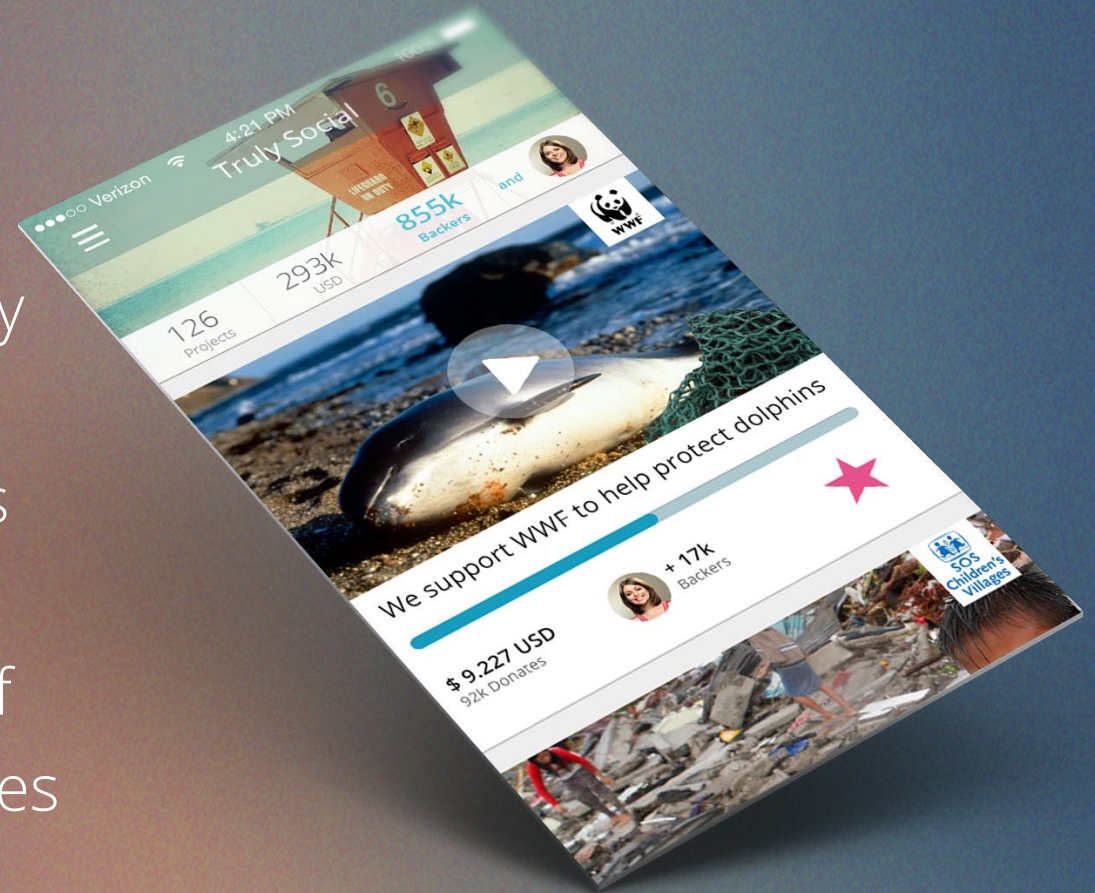

These can then trigger all
subscribers to call in via
WiFi, toll free or paid
national numbers, like
0800... and 0900...

Charity

All actions of SAYTYAs users which can be monetized, will be transparently credited to the creator as „donates“. All collected donates will instantly be forwarded to animals and humans in need of help whenever sufficient donates have been accumulated.

SAYTYA ME!

Partners and promoters
are more than welcome!
